We will review together several movements of change in our society and how they affect the very practical practices to which faith leaders must attend as they go about daily and special moments in the life of the church. We will cover the leadership competencies needed in order to be relevant and effective in such internal areas as: leading worship services, visitation ministries, administering the sacraments, receiving new members, managing aging buildings, etc. We will likewise explore such external issues, such as: gentrification, community organizations, social problems, etc. We will be a laboratory of learners, learning new concepts while pooling our experiences to create new paradigms of church leadership.
